Appl. No. : 09/699,136
Applicant : Daniel SANTI *et al.*
Filed : 27 October 2000
Title : HETEROLOGOUS PRODUCTION OF POLYKETIDES
TC/A.U. : 1652
Examiner : Kathleen M. Kerr

Docket No. : 010025.01

REPLACEMENT SEQUENCE LISTING TO COMPLY WITH 37 C.F.R. §§1.821-1.825

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicant hereby submits a REPLACEMENT SEQUENCE LISTING in both paper and computer-readable (diskette) form in response to the Office Communication mailed 10 December 2004. A one-month extension of time for reply is hereby requested.

The enclosed replacement sequence listing in paper and computer-readable (diskette) forms is a replacement for the sequence listing submitted filed on 25 August 2004. This replacement sequence listing is identical to that originally filed on 14 May 2002, and as such support is found in the specification on page 67, lines 15-40. These replacement sheets thus contain no new matter. The copy of the replacement sequence listing in computer readable form on the enclosed diskette is the same as the substitute sequence listing printed on the accompanying substitute sheets.

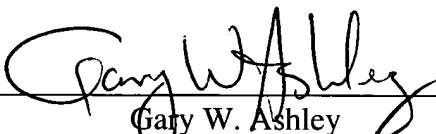

In the unlikely event that the transmittal letter is separated from this document and the Patent Office determines that an extension and/or other relief is required, Applicant petitions for any required relief including extensions of time and authorizes the Assistant Commissioner to charge the cost of such petitions and/or other fees due in connection
